

Ali Raza

SOFTWARE ENGINEER

Pakistan · alirazaansari.official@gmail.com · LinkedIn · GitHub · Contact: +923146126410

SUMMARY

Full stack engineer focused on building intelligent automation systems and scalable software platforms for startups and enterprises. Experienced in Agentic AI, LLM-powered systems, backend architecture, and production-grade web applications. Strong background in delivering secure, high-performance solutions tailored to business workflows and operational efficiency.

EXPERIENCE

Associate Software Engineer · Cyberify

FEBRUARY 2025 - PRESENT

On-site

- Delivered an AI-powered search and recommendation chatbot that improved product discovery and user engagement.
- Built reporting systems that enabled teams to generate PDF reports in seconds instead of hours.
- Developed an AI-driven property evaluation platform for real estate professionals through automated report generation.
- Created data processing and scraping pipelines that improved reliability and speed of business-critical data availability.

MERN Stack Developer (Freelance)

JULY 2022 - DECEMBER 2024

Remote

- Delivered custom web solutions for 10+ clients with consistent five-star reviews.
- Built projects ranging from landing pages to complex full stack web applications.
- Collaborated directly with clients to gather requirements and translate business needs into technical solutions.
- Maintained strong client satisfaction through communication, timely delivery, and project ownership.

EDUCATION

MNS University of Engineering and Technology · B.S. in Computer Science

October 2020 - October 2024
