

Ali Raza

SOFTWARE ENGINEER

Remote, Pakistan · alirazaansari.official@gmail.com · LinkedIn · GitHub · Contact: +923146126410

SUMMARY

Full Stack Software Engineer specializing in backend systems, AI-powered applications, and scalable automation platforms. Experienced in building LLM-integrated products, data pipelines, real-time systems, and production-grade APIs using TypeScript, Python, and Go. Passionate about distributed systems, developer tooling, and high-performance software architecture.

EXPERIENCE

Associate Software Engineer · Cyberify

FEBRUARY 2025 - PRESENT

On-site

- Built an LLM-powered product discovery chatbot using LangChain, vector search, and semantic retrieval pipelines, improving search relevance and user engagement.
- Designed automated reporting pipelines that reduced report generation time from hours to seconds through dynamic PDF rendering.
- Developed an AI-driven property evaluation platform for real estate professionals through automated report generation.
- Created data processing and scraping pipelines that improved reliability and speed of business-critical data availability.

MERN Stack Developer (Freelance)

JULY 2022 - DECEMBER 2024

Remote

- Delivered custom web solutions for 10+ clients with consistent five-star reviews.
- Delivered scalable full-stack applications including admin dashboards, workflow automation tools, and client-facing platforms using MERN stack.
- Collaborated directly with clients to gather requirements and translate business needs into technical solutions.
- Maintained strong client satisfaction through communication, timely delivery, and project ownership.

EDUCATION

MNS University of Engineering and Technology · B.S. in Computer Science

October 2020 - October 2024

SKILLS

Languages	TypeScript, Python, Go
Frameworks	Nest.js, FastAPI, Gin, LangChain, MERN Stack
Databases	MongoDB, Elasticsearch, PostgreSQL, MySQL, PGVector, Qdrant
Tools	Git, Docker, Kubernetes, CI/CD Tools (Github Actions, Jenkins, Cargo), Kafka
Automation	Terraform, Ansible
Cloud Platforms	AWS, Google Cloud Platform, Azure
Operating Systems	Ubuntu, Windows, Red Hat Enterprise Linux
