SUMMARY

Full Stack Engineer specializing in AI-powered applications, backend engineering, and intelligent automation. Experienced in building production-grade LLM applications, RAG systems, semantic search, AI agents, and scalable APIs using TypeScript, Python, Node.js, LangChain, LangGraph, and modern cloud technologies. Strong background in designing distributed systems, integrating enterprise data sources, and delivering performant, maintainable software that solves complex business problems.

EXPERIENCE

Associate Software Engineer

February 2025 – Present

Cyberify

On-site

- Developed AI-powered search, recommendation, and conversational chatbot solutions that improved product discovery and user engagement
- Built voice AI agents capable of handling real-time customer conversations and automating business workflows
- Developed AI-driven real estate property evaluation and automated report generation platforms for real estate professionals
- Designed reporting systems that reduced PDF generation time from hours to seconds through automated document pipelines
- Built and customized CMS applications, implementing content management features, user workflows, and administrative dashboards
- Created end-to-end automation workflows using n8n, integrating APIs and third-party services to streamline business processes
- Developed data processing and web scraping pipelines that improved the reliability and availability of business-critical data

MERN Stack Developer (Freelance)

July 2022 – December 2024

Fiverr

Remote

- Delivered custom web solutions for 10+ clients with consistent five-star reviews
- Built projects ranging from landing pages to complex full stack web applications
- Collaborated directly with clients to gather requirements and translate business needs into technical solutions
- Maintained strong client satisfaction through communication, timely delivery, and project ownership

EDUCATION

MNS University of Engineering and Technology

B.S. in Computer Science

November 2020 – November 2024

PROJECTS

[View Portfolio Projects](#) — Collection of AI-powered applications, full-stack systems, backend services, automation platforms, and open-source projects demonstrating experience with LLMs, RAG, AI agents, distributed systems, and modern web technologies.

SKILLS

Languages: TypeScript, Python

Frameworks: Nest.js, FastAPI, LangChain, LangGraph, MERN Stack

Databases: MongoDB, PostgreSQL, MySQL, PGVector, Qdrant

Tools: Git, Docker, Kubernetes, CI/CD Tools (GitHub Actions, Jenkins, Cargo), Kafka

Automation: Terraform, Ansible

Cloud Platforms: AWS, Google Cloud Platform, Azure

Operating Systems: Ubuntu, Windows, Red Hat Enterprise Linux
