PROFILE

I specialize in building intelligent automation and scalable software solutions for businesses ranging from early-stage startups to established enterprises. By combining deep expertise in Agentic AI with robust full-stack engineering, I help organizations modernize their workflows and launch production-ready platforms. From architecting LLM-powered systems to implementing enterprise-grade software, I deliver secure, high-performance technology tailored to your strategic goals.

EDUCATION

MNS University of Engineering and Technology

BS Computer Science

Oct 2020 – Oct 2024

EXPERIENCE

Associate Software Engineer

February 2025 – Present

Cyberify - OnSite

- Delivered AI-powered search and recommendation chatbot that improved product discovery and user engagement
- Developed reporting systems that enabled teams to generate PDF reports in seconds instead of hours
- Developed an AI-driven system for property evaluation for real estate professionals by generating reports
- Created data processing and scraping pipelines, enabling faster and more reliable data availability for business use cases

MERN Stack Developer

July 2022 – December 2024

Fiverr - Remote

- Got five star reviews from 10+ clients on Fiverr
- Worked on a variety of projects, from simple landing pages to complex web applications
- Collaborated closely with clients to gather and understand project requirements
- Delivered high-quality, customized solutions tailored to client needs
- Ensured client satisfaction through effective communication and project management skills
